MAISON LUMEN GROUP · LUMEN CONSOL (ORACLE FCCS)

The half-year close in 10 steps

End-user training for entity controllers · training data set: H1 2026 close

Training pack v1.0 · Prepared by Gaurav Sharma, EPM consultant · Fictional group and data

WELCOME

What you will be able to do

1. **Prepare and check your entity's package**
   Local data in your currency, intercompany detail, balance checks.

2. **Resolve intercompany differences**
   Read the matching report and correct with a journal, not by editing data.

3. **Follow the journal workflow**
   Prepare, scan, submit, get approval, post.

4. **Read the consolidated results**
   Worksheet, statements and the four close checks.

Agenda · 2 hours

09:30	The close process	20 min
09:50	Hands-on in Lumen Consol	60 min
10:50	Two exercises	30 min
11:20	Questions and support	10 min

Bring: your entity's H1 package and the list of your intercompany partners.

THE PROCESS

The close at a glance: 10 steps, 8 working days

1 — D+1

Log in, check your point of view

Entity controller

2 — D+2

Review your local package

Entity controller

3 — D+2

Complete the intercompany detail

Entity controller

4 — D+3

Check exchange rates

Group consolidation

5 — D+3

Match intercompany

Group consolidation

6 — D+4

Correct with a journal

Entity controller

7 — D+4

Approve and post journals

CFO, then preparer

8 — D+5

Run the consolidation

Group consolidation

9 — D+6

Review statements and checks

Group consolidation

10 — D+8

Sign off the close

CFO

Your steps as entity controller

ROLES

Who does what

EC

Entity controller (you)

- Submits the local package in local currency
- Details every intercompany balance by partner
- Prepares correcting journals

GC

Group consolidation team

- Loads the exchange rates
- Runs intercompany matching and the consolidation
- Reviews results and the close checks

CFO

Approver (CFO)

- Approves or rejects journals, with a reason
- Signs off the consolidated figures
- Never posts a journal they approved

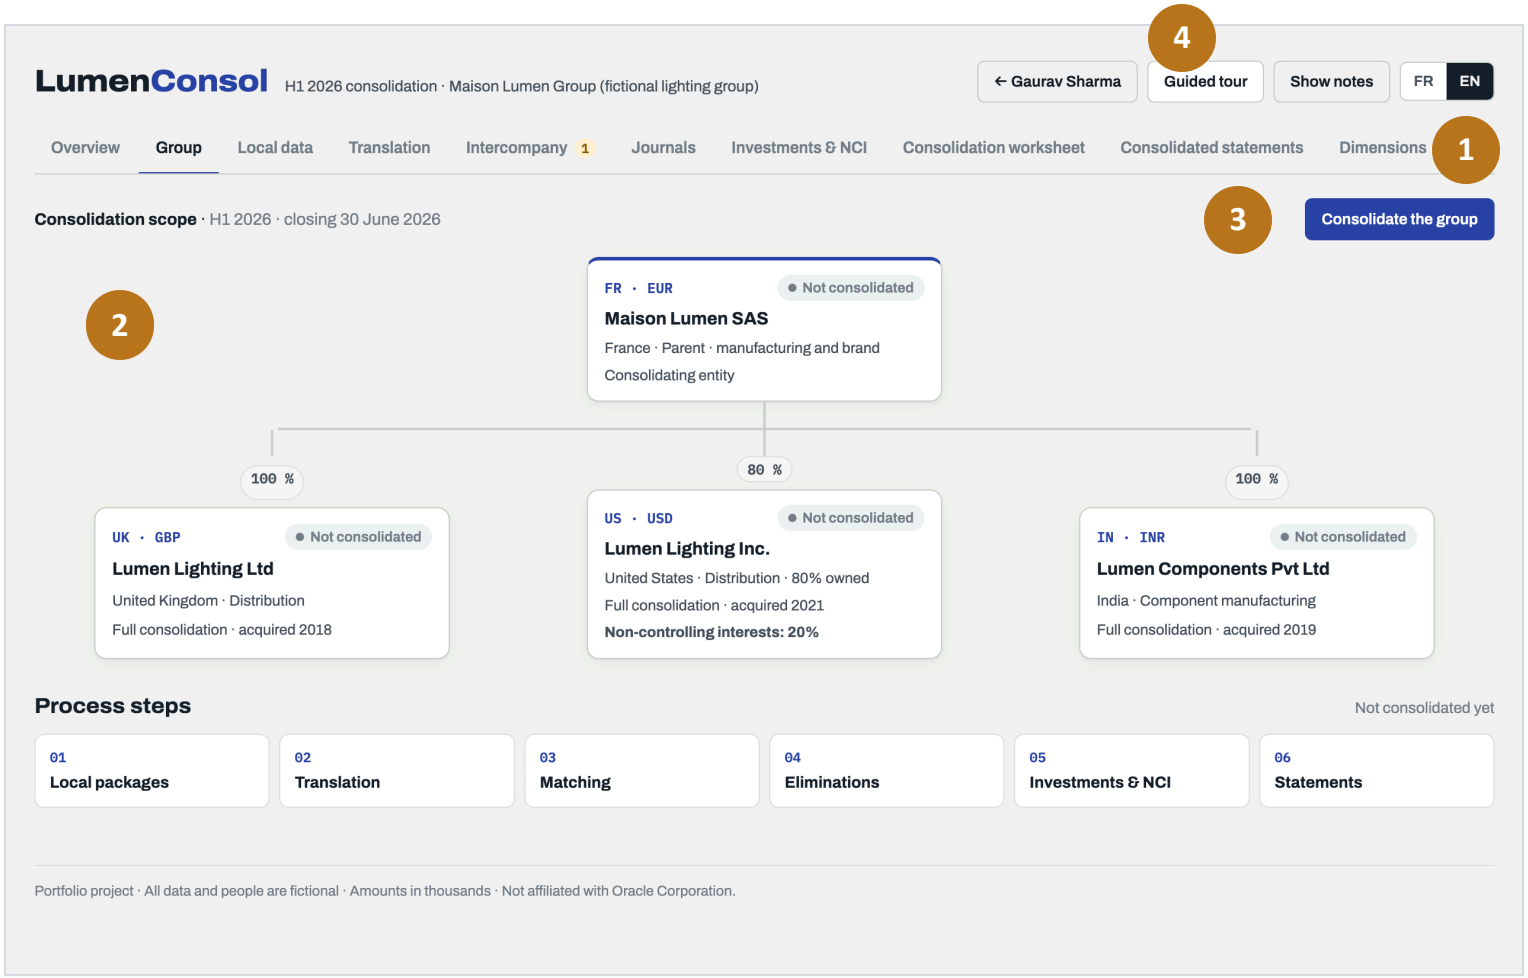

AU

Statutory auditors

- Consulted on consolidation rules
- Review journals and checks at the half-year review

STEP 1 · D+1

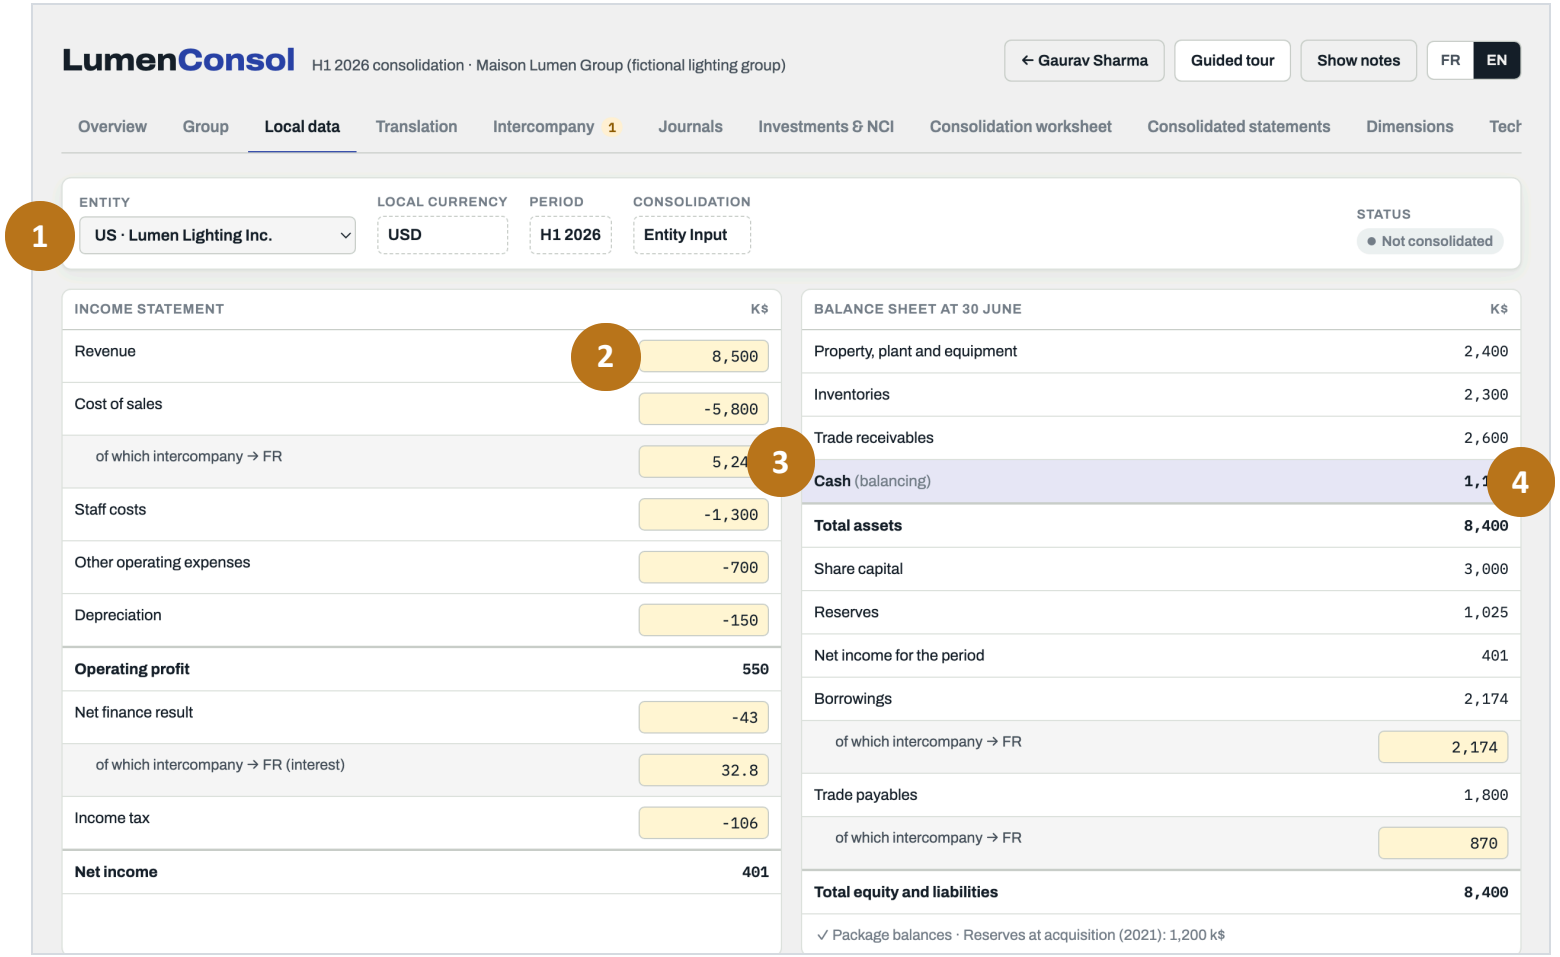

Find your way around

1. **Tabs** follow the close: local data, translation, intercompany, journals, results.
2. **Scope**: the four companies, the share held and the status (Not consolidated, OK, Impacted).
3. **Consolidate the group**: group team only.
4. **Guided tour and notes** explain every screen.

STEPS 2 AND 3 · D+2

Review your local package

1. **Your entity**: amounts in its own currency (here USD).

2. **Yellow cells** are editable; totals are calculated.

3. **Of which intercompany**: the partner of every internal flow. Matching relies on it.

4. **Cash balances the package**: if it looks wrong, another line is wrong.

STEP 4 · D+3

Exchange rates: which rate for which line

Closing rate

1.1700

EUR for 1 GBP

Balance sheet

Assets and liabilities at 30 June

Average rate

1.1650

EUR for 1 GBP

Income statement

Revenue, costs and net income for H1

Historical rates

1.2000

EUR for 1 GBP

Equity

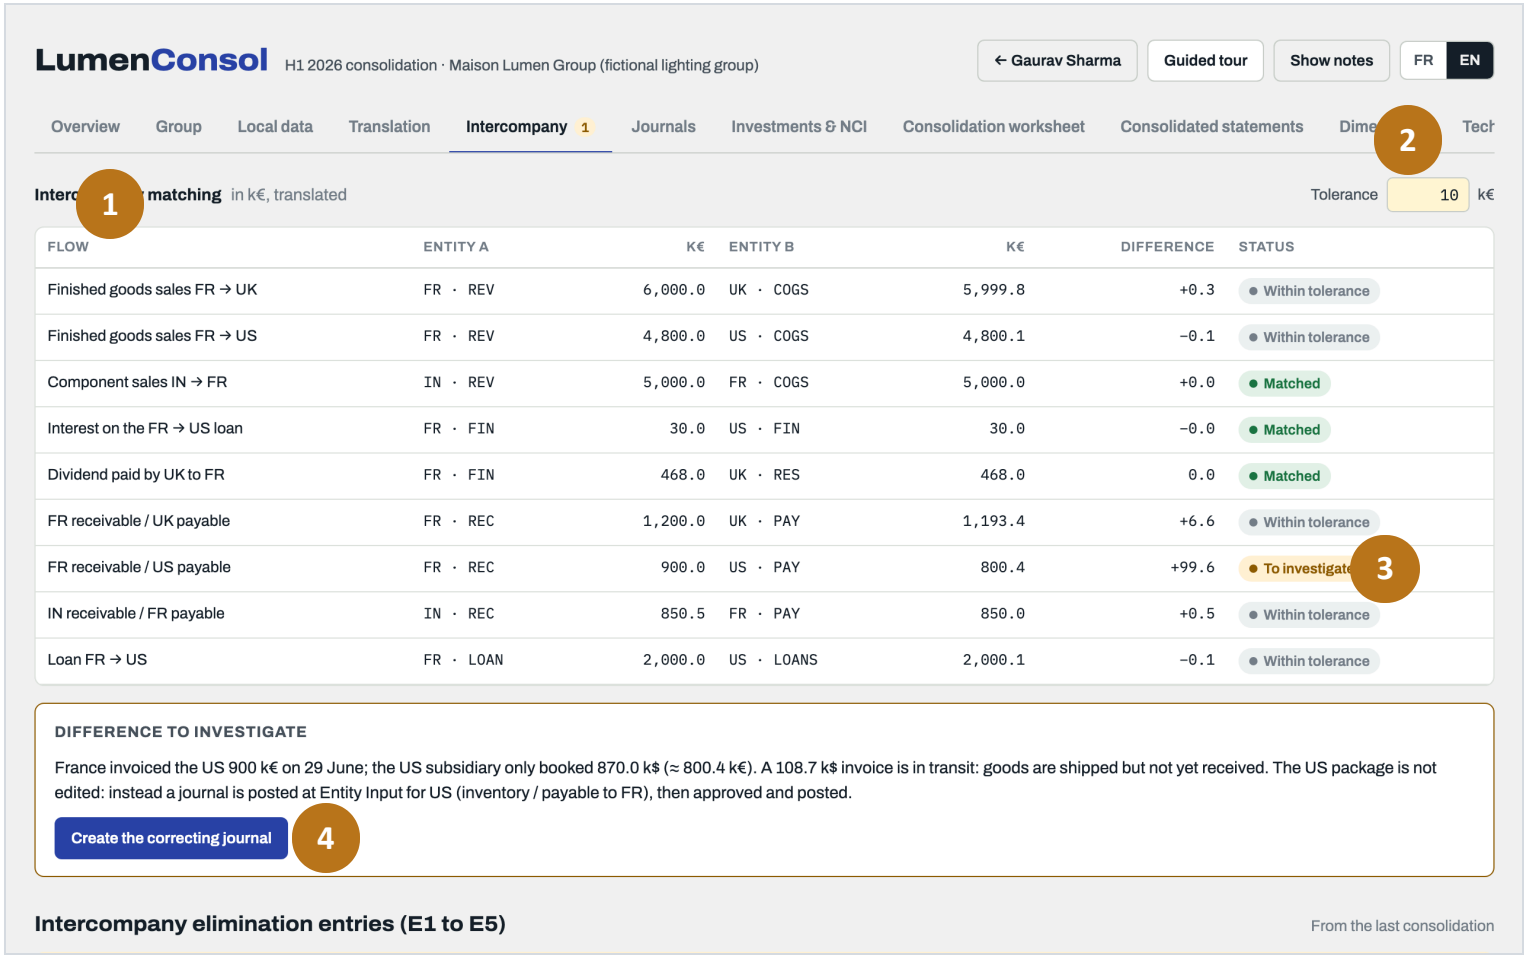

Capital and reserves at their original rates; dividends at the payment date

The difference is the translation reserve (IAS 21). It is not a gain or a loss: it sits in equity, and its movement for the half-year is reported in other comprehensive income.

Check on the Translation tab that your entity's figures in euros look right, then tell the group team.

STEP 5 · D+3

Match intercompany

1. **One line per pair**: seller and buyer, both in euros.
2. **Tolerance**: up to 10 k€ is accepted (FX, rounding).
3. **To investigate**: FR invoiced 900 k€; the US booked about 800 k€.
4. **Create the correcting journal** from here.

Matched

Within tolerance

FX difference

To investigate

STEP 6 · D+4

Correct with a journal, never by editing the package

Why a journal?

- The package stays as submitted: journals are stored separately (Data Source: Journal Input).
- Every correction has an author, a date and a reason for the auditors.
- Someone other than the preparer approves it.
- Entity Input: in the entity's currency, translated with its package.

US_IC_INTRANSIT_0629 · Entity Input · USD

FR invoice of 29 June in transit: goods shipped, not yet received

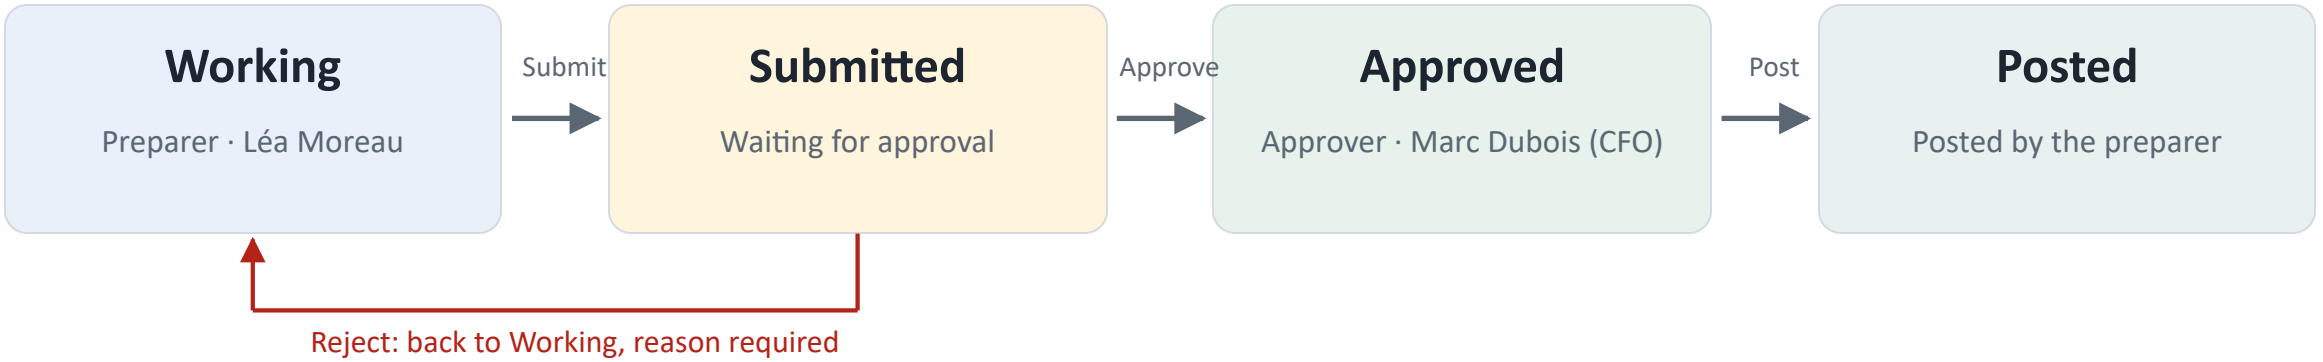

Entity	Account	ICP	Debit	Credit
US	Inventories	—	108.7	
US	Trade payables	ICP_FR		108.7
Total			**108.7**	**108.7**

108.7 k$ = 100 k€ at the closing rate of 0.92. The partner ICP_FR lets matching pair the payable with France's receivable.

Label rules: no spaces or special characters, unique. **Balance**: each entity balances in its own currency. **Partner**: never the entity itself.

STEP 7 · D+4

Approve and post: the journal workflow

Whoever approves does not post

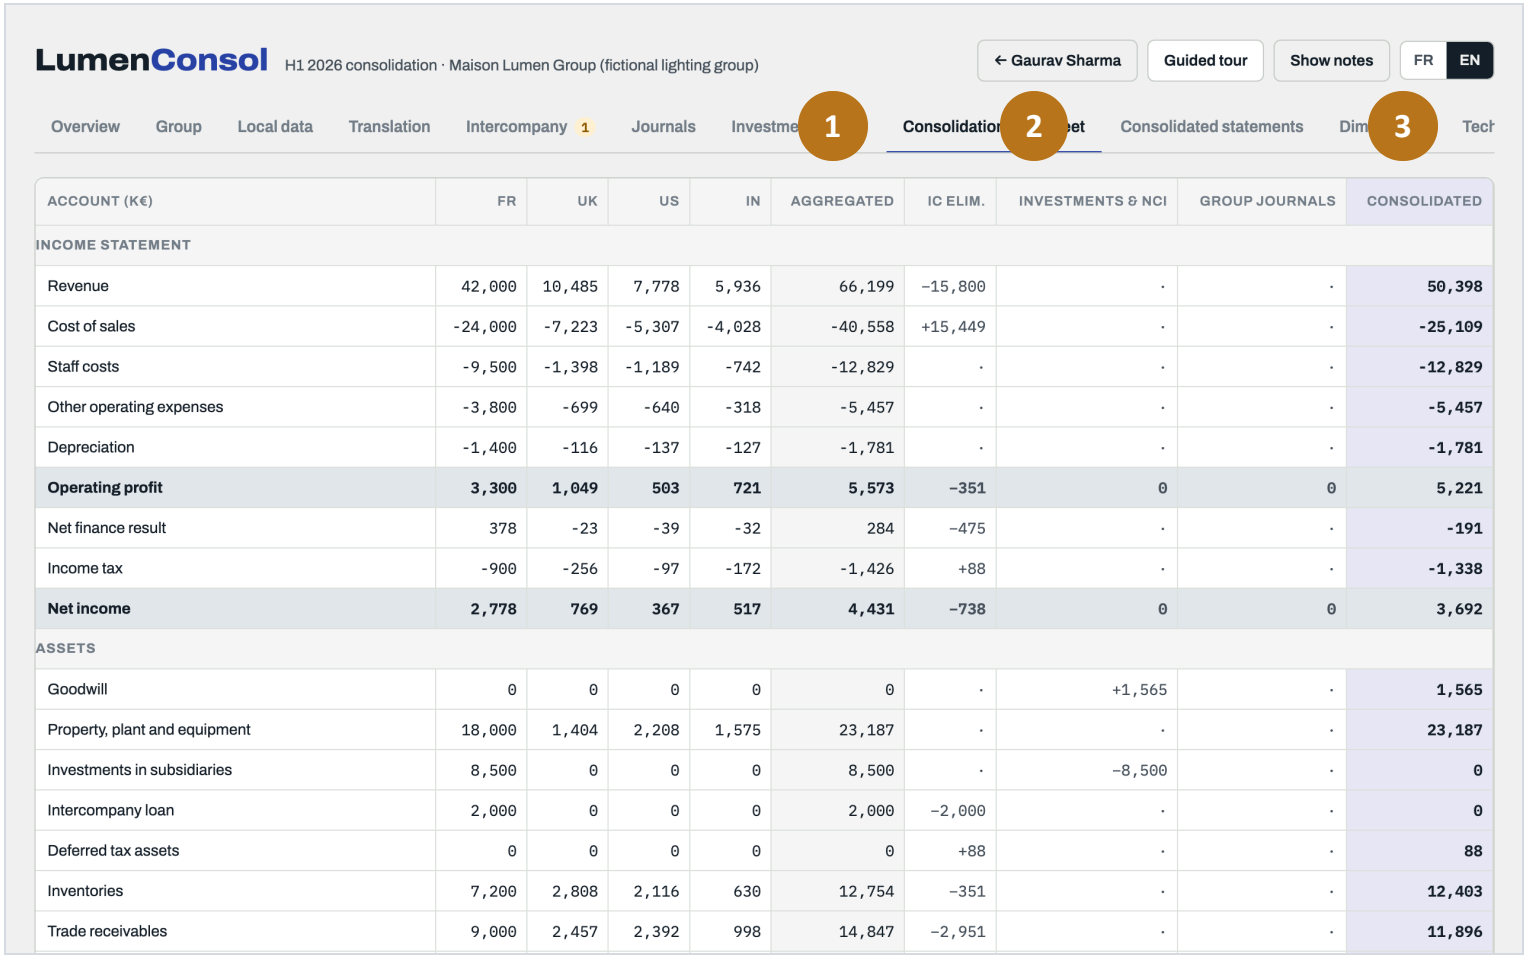

The CFO approves; the preparer posts. The auditors check this rule on every journal.

Scan before you submit

- Label format and uniqueness
- Balance by entity, in its currency
- No negative amounts, no debit and credit on one line
- Valid intercompany partners

STEP 8 · D+5

Run the consolidation and follow the calculation

ACCOUNT (K€)	FR	UK	US	IN	AGGREGATED	IC ELIM.	INVESTMENTS & NCI	GROUP JOURNALS	CONSOLIDATED
INCOME STATEMENT									
Revenue	42,000	10,485	7,778	5,936	66,199	−15,800	·	·	**50,398**
Cost of sales	-24,000	-7,223	-5,307	-4,028	-40,558	+15,449	·	·	**-25,109**
Staff costs	-9,500	-1,398	-1,189	-742	-12,829	·	·	·	**-12,829**
Other operating expenses	-3,800	-699	-640	-318	-5,457	·	·	·	**-5,457**
Depreciation	-1,400	-116	-137	-127	-1,781	·	·	·	**-1,781**
Operating profit	**3,300**	**1,049**	**503**	**721**	**5,573**	**−351**	**0**	**0**	**5,221**
Net finance result	378	-23	-39	-32	284	−475	·	·	**-191**
Income tax	-900	-256	-97	-172	-1,426	+88	·	·	**-1,338**
Net income	**2,778**	**769**	**367**	**517**	**4,431**	**−738**	**0**	**0**	**3,692**
ASSETS									
Goodwill	0	0	0	0	0	·	+1,565	·	**1,565**
Property, plant and equipment	18,000	1,404	2,208	1,575	23,187	·	·	·	**23,187**
Investments in subsidiaries	8,500	0	0	0	8,500	·	−8,500	·	**0**
Intercompany loan	2,000	0	0	0	2,000	−2,000	·	·	**0**
Deferred tax assets	0	0	0	0	0	+88	·	·	**88**
Inventories	7,200	2,808	2,116	630	12,754	−351	·	·	**12,403**
Trade receivables	9,000	2,457	2,392	998	14,847	−2,951	·	·	**11,896**

1. **Aggregated**: the four companies translated into euros, added up.

2. **Eliminations**: intercompany (E1 to E5) and investments with NCI (E6).

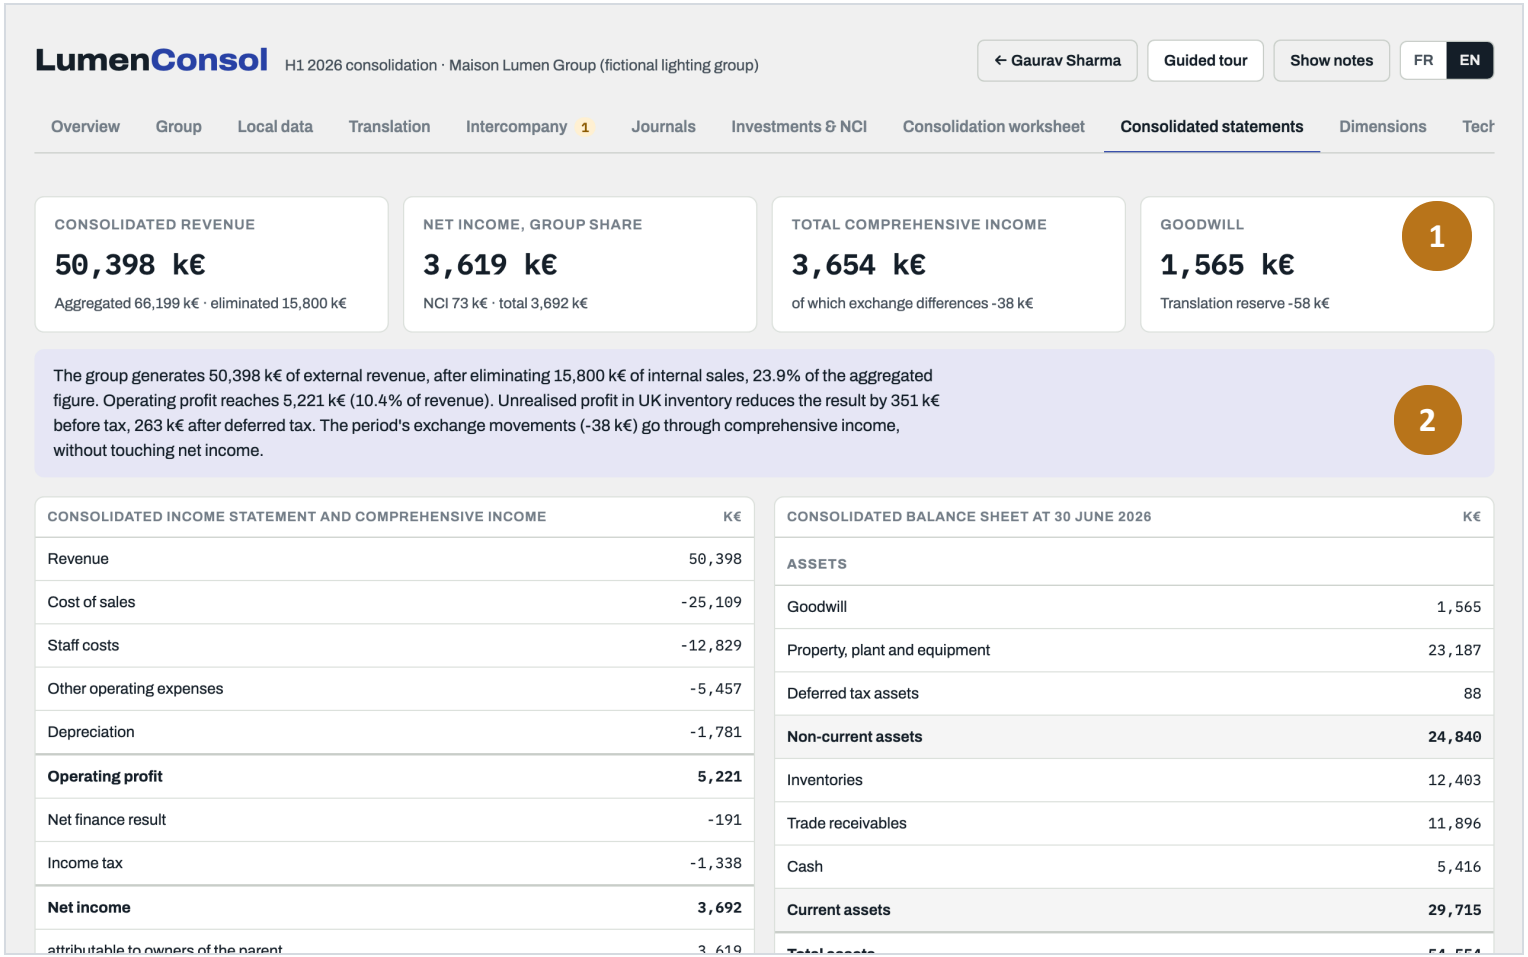

3. **Consolidated** = aggregated + eliminations + group journals.

Status after the run

Every entity shows OK. Any later change turns it to Impacted: consolidate again before reading the figures.

STEP 9 · D+6

Review the statements and the four checks

1. **Key figures**: revenue, net income (group share and NCI), comprehensive income, goodwill.

2. **Summary in plain words** of what the consolidation did.

The four close checks

- ✓ Balance sheet balances
- ✓ No intercompany difference in suspense
- ✓ Investments and loan fully eliminated
- ✓ All entities consolidated with the latest data

STEP 10 · D+8

Sign off the close

- ✓ Every entity shows OK: no entity Impacted
- ✓ The four close checks are green
- ✓ No journal left Submitted or Approved without being posted
- ✓ Auto-reversing journals scheduled for July
- ✓ Commentary ready: revenue, net income, translation reserve
- ✓ CFO sign-off recorded; period locked

TARGET

Day 8

Last year: day 12

Four days gained by matching intercompany early and correcting with approved journals.

HANDS-ON · 30 MIN

Exercises

Exercise 1 · Clear the invoice in transit

1. On Intercompany, find the line To investigate
2. Create the correcting journal, scan and submit it
3. Switch to Approver and approve; switch back and post
4. On Group, consolidate again

Expected result

No line To investigate · suspense at 0 · balance sheet at 54,654 k€ · all four checks OK

Exercise 2 · Test a currency move

1. On Translation, click Pound sterling −5 %
2. Note that UK turns Impacted
3. Consolidate again
4. Compare the translation reserve and net income

Expected result

The translation reserve and comprehensive income fall; net income moves only through the average rate; the balance sheet still balances

TIPS

Common mistakes and how to avoid them

! Editing the package to fix a difference

Post a journal: the package stays as submitted.

! Forgetting the partner on an intercompany line

Every internal balance needs its partner, or matching cannot pair it.

! Investigating tiny FX differences

Up to 10 k€ they are accepted and go to finance result automatically.

! Reading figures from an old run

If an entity shows Impacted, consolidate again first.

! Approving and posting the same journal

Approver and poster must be two different people.

! Raising a difference at D+4

Call your counterpart as soon as matching shows the gap.

SUPPORT AND NEXT STEPS

Questions and support

During the close

- Group consolidation team: first contact for any question
- User guide and this deck on the finance intranet

Application issues

- IT support logs the incident
- Oracle support request (SR) raised by IT when needed

Next steps

- Parallel run on the November close (1 to 14 December 2026)
- Go-live on the year-end close (8 January 2027)
